

When you are done with this paper, you can...recycle it...make a paper airplane...draw a picture on the other side...make a pinwheel...make paper snowflakes...give it to a friend...make a paper fortune-teller...shred it and

# Little Green Steps

## "Play It Again"

Try making these fun crafts made from recycled materials:

### Oatmeal Box Tunnel

Have a grown-up cut a cylindrical oatmeal box in half lengthwise to create a car or train tunnel. Decorate the outside of the box with crayons or stickers!

### Tin Can Herb Pot

Use an old tin can to grow herbs in! Wrap your can in paper or paint it to decorate. Have a grown-up make a hole in the bottom of the can for drainage. Fill with bottom with gravel and top with soil, then plant seeds or plants. Place your herb pot in a sunny window and enjoy.

### Colorful Water Bottle Vase

Have a grown-up cut the top off and remove the label from a plastic water bottle. Mix a solution of ¼ cup glue and 2 tablespoons of water. Paint a small area of the bottle with the glue mixture and cover with a strip of colored tissue paper. Repeat until the whole bottle is covered with glue and different colored tissue paper.

### More fun crafts to make...

Rocket	South American Rain Sticks	Sock Puppets
Add a construction paper nose cone and fins to a toilet paper roll covered in colored paper to make a rocket!	Secure a 3 inch square of wax paper around one end of a paper towel tube with a rubber band. Add dried rice or beans and crumpled pieces of aluminum foil to the tube and seal the open end the same way as the bottom. Decorate the tube, then shake it and listen to the rain!	Glue or sew buttons and fabric scraps on the toes. Use fabric pens or markers to draw faces. Then, make a theater out of a large cardboard box and stage a recycled puppet show!

What other things can you make from recycleable materials?
